I pay for the services provided by XM radio...including traffic and weather info. I prefer selecting what I listen to rather than having that decided for me by the National Association of Broadcasters. If the high quality [commercial free] variety offered by XM were available through other resources I might be compelled to make another choice.

I respectfully urge you to reject NAB's petition 04-160 and provide the kind of programming that I want, deserve, and am willing to pay for.
